

Case Study | Endoscopy – CGH

Client	Cheltenham General Hospital
Main Contractor	E G Carter & Co Ltd
Consultant	ESDP Ltd
Contract value	£230,000

Neptune Building Services has recently completed the mechanical and electrical refurbishment of the Endoscopy Department at Cheltenham General Hospital.

The project involved the supply and installation of new air handling equipment and extension/upgrading of the existing medical gases, heating, chilled water, and domestic water services to suit the new layout. Additional specialist BMS controls have also been provided to manage the new equipment within this space.

Electrically, we upgraded the existing lighting and small power throughout, including IPS/UPS systems and sockets in this area. We also extended and upgraded the fire alarm system, nurse call, and access control to the main entrance, employing NHS preferred specialists for these disciplines.

Adjacent ward areas remained operational whilst our works were being carried out with close co-ordination with local staff and department heads.
