

Case Study | Gloucester Hospital Endoscopy Refurb

Client	Glos Hospitals NHS Trust
Main Contractor	E G Carter & Co Ltd
Contract value	£430k (M&E)

Neptune Building Services completed the reconfiguration works within the Endoscopy Department at Gloucester Royal Hospital for EG Carter & Co Ltd.

We undertook the installation of both the mechanical and electrical services within this area, as detailed below:-

The mechanical services are generally as follows:-

- ❖ The installation of 1no. HTM compliant AHU complete with new ventilation system, air conditioning, fire dampers, medical gases, BMS controls with also integration into the existing domestic water and heating systems.

The electrical services are generally as follows:-

- ❖ LV power and DB equipment, electrical wiring, specialist lighting, , containment, fire alarm, IT comms wiring, and coms wiring of all specialist equipment. Infrastructure for specialist scanning equipment (Siemens)

The project required extensive and regular co-ordination meetings with the Main Contractor to work alongside as well as maintain fully operational adjacent zones throughout the term of the contract – this being particularly difficult due to the enhanced protocols associated with the nature of these areas.
